ALARM**

**PEACE OF MIND
- NO MATTER WHERE YOU ARE -**

CAVIUS is your ultimate travelling companion, giving you peace of mind when it comes to your personal safety and security. When travelling for business or pleasure, or just everyday journeys, **CAVIUS** provides a high level of protection for yourself, your loved ones and your belongings.

1

PERSONAL ATTACK ALARM

The Personal Attack Alarm function can be used as a deterrent against would-be attackers. Carry **CAVIUS** in your pocket or in your hand for use during uncertain or unsafe situations. Ideal for when you are out walking, jogging, or if you have spent a late night studying at the library or working in the office and are walking alone to your car, train or bus.

2

OPTICAL SMOKE DETECTOR

CAVIUS has an Optical Smoke Detector, which activates when smoke enters the smoke chamber. **CAVIUS** is ideal for use in accommodation, caravans, cabins, boats or wherever fire and smoke protection is required. When travelling overseas it may not be apparent to you whether there are working smoke detectors or if there is adequate fire protection installed. For your own peace of mind, use **CAVIUS** in your accommodation so you will receive early warning – if there is a fire.

3

DOOR MOVEMENT ALARM

By activating and placing **CAVIUS** in front of the door in your room, you will be instantly alerted if someone enters your room. Placed in a drawer containing your valuables, **CAVIUS** movement sensor will sound the alarm if the drawer is opened. Ideal in accommodation, with inadequate locks or when travelling alone for business or recreation.

4

BAG MOVEMENT ALARM

Protect your belongings from being tampered with or stolen. Put **CAVIUS** in your backpack or suitcase while you are waiting for your flight, train or bus, or if you are leaving valuables in your accommodation. Place **CAVIUS** inside your handbag, suitcase or laptop bag while at business conferences or meetings. **CAVIUS** will also protect your belongings while swimming or attending the gym. In fact **CAVIUS** is ideal anywhere bags are either left unattended or placed beside you.

When **CAVIUS** senses movement it will sound the alarm and deter a thief.

An easy to use, compact and lightweight, 130db alarm.

Fits perfectly in the palm of your hand, so it is easy to activate.

4-IN-1 PERSONAL PROTECTION

4 Security functions in one device.

- 1 PERSONAL ATTACK ALARM**
Carry in your pocket or in your hand for uncertain or unsafe situations, use as a deterrent against would-be attackers.
- 2 OPTICAL SMOKE DETECTOR**
Ideal for use in accommodation, caravans, cabins and boats or where fire and smoke protection is required. This function can be set in conjunction with either of the movement alarm options.
- 3 DOOR MOVEMENT ALARM**
With a built-in movement sensor, be advised instantly if someone opens your room door or accesses a drawer containing your valuables.
- 4 BAG MOVEMENT ALARM**
Protect your belongings from being tampered with or stolen. Ideal for backpacks, suitcases, laptops, camera bags and handbags.
